DIELECTRIC SOLUTIONS EXPANDS MANAGEMENT RANKS

--Key Staff Additions to Support Company Sales Growth--

East Butler, PA – Dielectric Solutions, LLC, an advanced materials company specializing in high performance glass fiber products, today announced several new management appointments.

Todd Kadar, President and CEO, said that the staff additions will support continued expansion of its sales in key North American and overseas markets, and will help accelerate the introduction of its technology into new segments of the global electronics and composites markets.

Patricia Goldman has joined the company as Manager, Technical Service. Patricia has more than 25 years of experience in the printed circuit board industry, in capacities ranging from sales and marketing to process engineering and R&D. Most recently Patricia was in sales with BoardBuyers.com and prior to that was in sales and marketing with several leading suppliers to the electronics industry. Patricia has a BA in Chemistry from Mansfield University and an MBA from the University of Connecticut.

Gina Hogue has been hired as Manager, Quality Systems. Prior to joining Dielectric Solutions, Gina was Senior Engineer and Quality Manager at Nalco Company, and previously held similar positions with Siemens Westinghouse Power Corp. and Anchor Hocking Co. Gina has a BS in Chemical Engineering and a BS in Chemistry from Geneva College, as well as an MBA from Carnegie Mellon University.

Jeff Montgomery has joined the company as Formulation Chemist. Jeff has a BS in Chemical Engineering from the University of Pittsburgh and was previously with

Associated Ceramics and Technology, and Castle Rubber Company.

Michael Helbling has been hired as Accounting Manager. Michael has 25 years experience in accounting and finance with several industrial manufacturing companies and has a BS in Accounting with a minor in Computer Science from Pennsylvania State University.

Chris Angelopoulos has joined the company as Senior Manufacturing Engineer. Chris has a degree in Electrical Engineering Technology from West Virginia University, Institute of Technology and over 30 years of manufacturing experience in areas of Process and Facility Engineering. Prior to joining Dielectric Solutions, Chris was Facility Engineering and Maintenance Manager for Lenox, Inc.

Dielectric Solutions is an advanced materials company specializing in light-weight glass fiber fabric, a key component of many advanced electronics products. The Company has developed a revolutionary, streamlined manufacturing process, the GlasFab® Process, which significantly reduces handling, while increasing efficiency and product quality. The patented process produces a superior product that is not only thinner, stronger, more uniform but also exhibits improved electrical, thermal, and mechanical properties as compared to other commercially available products. In addition to electronics, Dielectric Solutions' products are being sold into a wide range of high-tech composite applications in industries such as ballistics, aerospace, construction, and petroleum. For more information please contact Eileen Bonahoom at 724-284-9883, or email info@dielectricsolutions.com.
